SUMMARY

Internship Experience – Full Stack Developer

I have successfully completed a **6-month internship as a Full Stack Developer**, where I gained strong hands-on experience in building and maintaining web applications. During my internship, I worked extensively with the **MERN stack (MongoDB, Express.js, React.js, and Node.js)** to develop dynamic and responsive full-stack applications. I was involved in both **front-end and back-end development**, including creating user-friendly interfaces, developing RESTful APIs, and integrating applications with databases. In addition to the MERN stack, I have also **worked with PHP and Laravel**, where I developed backend functionalities, dynamic forms, authentication systems, and admin dashboards connected to MySQL databases.

EDUCATION

RIMT UNIVERSITY, Mandi Gobindgarh, Punjab, India - Bachelor Computer of Application
- CGPA: 7.3 (2022-2025)

Mulltipurpose Sen.Sec.School, Ludhiana - 12th(80%) (2021)

Government High Smart Sen.Sec.School,Dhandari Kalan, Ludhiana - 10th(65%) (2019)

Internship Experience & CERTIFICATIONS

INTERNSHIP CERTIFICATE, A2itInternEdge (internship)

Project : Visitor Management System

Description & Responsibilities:

- Developed a **dynamic Visitor Management System** with secure **login authentication using sessions**.
- Designed and implemented a **MySQL database** to store visitor and admin data dynamically.
- Created an **admin dashboard** to manage visitor records, including **date and time tracking**.
- Implemented an **automatic email notification system** using **SMTP**, where the admin receives an email whenever a new visitor registers.
- Configured **email notifications for visitors** when their appointment is approved or fixed.

Project : Dynamic Application & Query Management System

- **Developed the complete** backend using Laravel framework.
- **Created** dynamic application forms,
 - Users receive a confirmation email after form submission.
 - Admin receives an instant email notification for every new application/query.
 - Built a **Query Management Module** to handle contact form submissions.
 - Stored all contact form data securely in the **database**.
 - Implemented **automatic thank-you emails** to users after successful form submission.
- Developed an **admin approval & rejection system**, where:

PROJECTS

- Developed a responsive **Banking & Finance website** using HTML, CSS, and media queries, ensuring optimal user experience across devices.
- Built a full-stack **Online Vegetable Store** with frontend

Technical Skills And Interest

Programming Languages : JavaScript, PHP , Laravel

Front-end Technologies : React JS, HTML, CSS,Talwind, JavaScript

Back-end Technologies : Node.js, Express.js,PHP,Laravel

Databases: MongoDB,MYSQL
